CMS 125: Breast Cancer Screening

This measure is only supported by ACO and MVP, participation has been removed from the MIPS dashboard. Please use the quality measure dashboard [2101303201].

Description:	Percentage of female patients aged 40 – 74 years of age who had a mammogram to screen for breast cancer in the 27 months prior to the end of the measurement period. This measure is only supported by ACO and MVP participation.
Exclusions:	Patients who had a Bilateral mastectomy or two Unilateral (right and left) mastectomies. Patients who receive palliative or hospice care. Patients 66 years and older with criteria indicating frailty, advance illness or who are taking dementia medication.
Exceptions:	None.
Telehealth:	Encounters are included for measured satisfaction. Screening can be asked, ordered, and documented during a telehealth visit.
Measure Steward:	National Committee for Quality Assurance (NCQA).
Specialty:	Family Medicine, Internal Medicine, and OB/GYN
Qualifying Encounter(s):	Office Visit, Home Health Services, Nutrition Services, Preventative Care Services, and Telephone Visit.

How to Satisfy this Measure: Results Needed

1. Closed Screening Mammogram order.
2. External Results.
   a. Label **HM Mammogram (HM1)**.

Front Desk Team Member Role Workflow

1. At check-in, have the patient complete the **Authorization for Disclosure of Protected Health Information.**
2. **Prior to the appointment**, check for an **Open Order**.
   a. Call the patient to verify if they have scheduled the appointment.
      i. If they **have not**:
         1. Review the patient's chart to see if there are any notes from CXC about insurance.
         2. Share the referral information for the patient to schedule a specialist appointment.
3. **After the appointment**:
   a. Confirm they attended the appointment.
   b. Ask for records or send fax to obtain records.
      i. If the records are in OnBase, the document type should be tied to the order and labeled Mammogram.
   c. If necessary, scan external records into the chart following the external scanning workflow.

Note: Use the external scanning workflow only when records are external and already reviewed by the clinician.

Clinical Team Member Role Workflow

1. During **Pre-Visit Planning**, review open orders for the mammogram.

   a. Track open orders for **Upcoming Appointments**.

      i. If there is an **Open Order**, request the patient to schedule and complete.

      ii. If the order is **Complete**, confirm it has closed the **Health Maintenance Topic, Breast Cancer Screening.**

   b. Confirm **Completion of Imaging Order**.

   c. Request records from referred to clinician/clinic.

2. If there is **No Existing Order**, order a **Mammogram** from a **SmartSet (green checkmark)** on the **Storyboard** or from the **Visit Task Bar**.

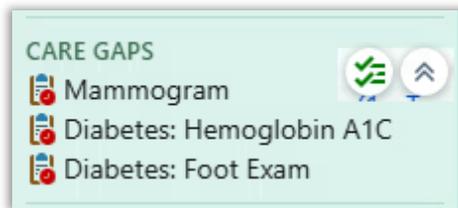

3. Check the box for the **Screening** → **Accept**.
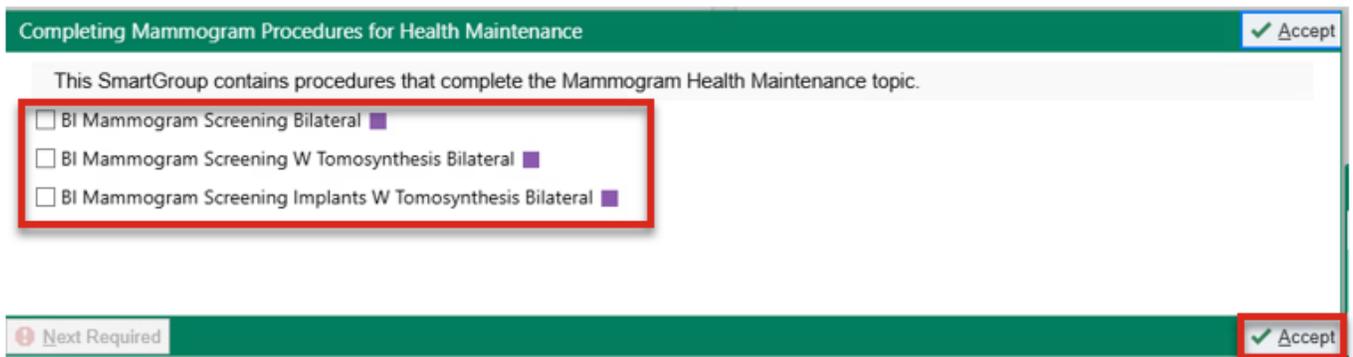

Note: If a provider orders a Mammogram, the measure will not be satisfied until the result is added to the patient's chart.

Provider Role Workflow

1. Orders alone will not close the care gap. The **order must have results**.

2. For **women 40-74 years of age**, order a screening **mammogram** at least **1 time every 24 months**.

3. Once the result has returned through the interface, it will appear in the **Imaging tab** of the **Patient's Chart Review**. These results will **automatically close the care gap**.

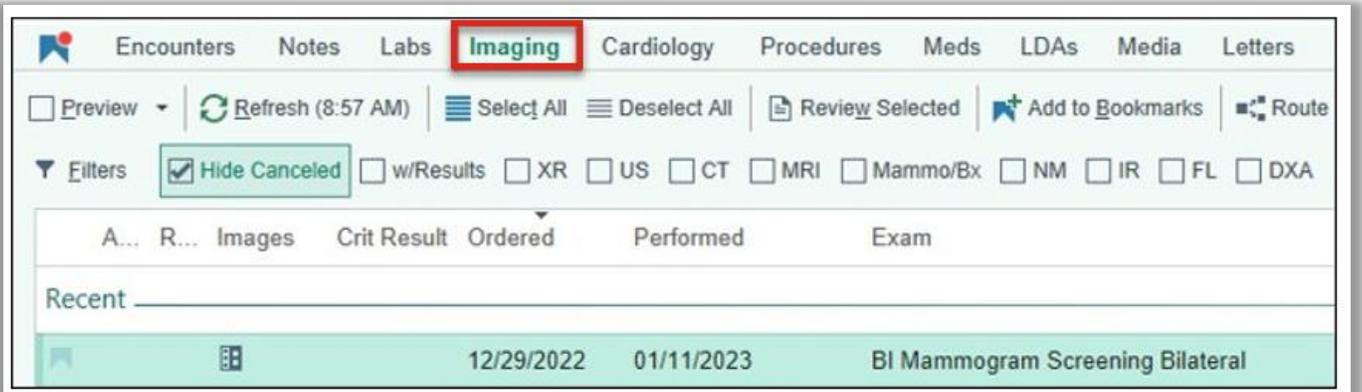

Documenting External Results

1. From Media Manager → select **Ext Results**.

2. Search for → select **HM Mammogram**.

3. Enter the correct information in the **Ordered By**, **Order Date**, and **Result Date**.

4. Click **Create Results.**

5. Choose **+ Add New Media**.

6. Select the **Document Type** of Mammogram.

   a. **HM Mammography (HM1)**

   b. **HM Unilateral mammogram – Left (HM26)**

   c. **HM Unilateral mammogram – Right (HM25)**

7. Connect the order to an encounter.

   a. **HM Mammography** will already be selected.

   b. Create a **New Encounter**.

      i. Encounter Type = **Orders Only.**

   c. Click **Accept**.

8. Click **Scan** or **Import**.

9. Find the document in your drive → click **Open**.

   a. The document shows in the **Media Attachment Section**.

10. Complete the **Document Information** section.

    a. Document type and description should match.

    b. Review **Received By and Received On** date to make sure it **matches the document**.

    c. The **Result Date** will be what you entered in the HM Mammography order.

    d. Adding recipients in the **Send Document To** section will send this information to the providers in basket.

    e. Click **Accept**.

Documenting Exclusion

1. From the **Problem List.**
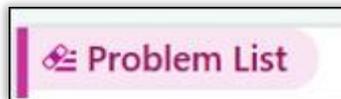

2. Add **History of Bilateral Mastectomy** or **Right and Left Unilateral Mastectomies**.

3. From the **Surgical History** documentation **Mastectomy.**

4. Add **Hospice Or Palliative Care**.

5. Add a current diagnosis of **FRAILTY**:

   a. Patients 66 and older with Advanced Illness or Frailty.

   b. Taking dementia medications (Donepezil, Rivastigmine, Galantamine, Memantine).

   c. Living in long-term nursing homes.
